Overview

This workshop serves as an introduction to ECO PRINTS, a natural dyeing PROCESS using plants, flowers, leaves, vegetables, and fruits; cloth or paper; and heat/steam. Participants will create an Eco Print Accordion Book assembling a collection of floral and vegetal prints produced from natural pigments. Eco Printing produces a transfer of natural pigment from the flowers to the paper with the use of steam to form intricate designs and patterns. As a creative writing activity participants will write TEN word poem to include in their books. Participants will explore eco printing techniques, identify a variety of colors, experiment with natural materials, and create botanical prints.
